

STRATA ASSOCIATE CONSULTANTS

Stephen Lewis is an electrical engineer who has over 30 years of electricity supply industry experience. His previous career with National Grid plc spanned the UK, the USA, Australia and South America. Stephen's extensive knowledge includes both transmission and distribution at governance levels. He is currently a Director of MainPower New Zealand Ltd., and a Trustee and Chair of the Community Energy Action.

Kieran Devine has extensive experience in the electricity and energy industries, which includes senior management expertise across electrical, energy and infrastructure engineering organisations. For 10 years, Kieran was the General Manager System Operations for Transpower New Zealand, managing the real-time operation of the New Zealand electricity system and also the New Zealand wholesale electricity market.

Doug Goodwin is an independent consultant. Doug is an electrical engineer with broad experience in the electrical supply industry and particularly in electricity market and power systems operations. Doug has held senior management positions in power systems design, project management, and operations.

Hugh Driver is a mechanical engineer and Associate Consultant for Strata Energy Consulting Limited. In addition to his extensive engineering experience, Hugh has developed leadership, governance and management skills through roles in strategic development, corporate and operational risk, multi-million dollar construction and divestment projects, business operations and logistics. Hugh also has experience in change management processes.

He is a past Chairperson of NZ LPG Association Technical Committee (1993-1999) and a member LPGA Executive Committee (1996-1999).

Ramu Naidoo has over 10 years' local and international experience in power systems operations and planning. He has held senior analytical roles, has extensive experience in power system operations and planning and detailed knowledge of the New Zealand electricity market System Modelling. Ramu has extensive practical and theoretical knowledge of mathematical model development and detailed understanding of optimisation methods and electric power systems.

David Swanson is an internationally experienced energy sector senior manager and chartered engineer with strong leadership capabilities to undertake both strategic and operational roles in both electricity and gas sectors. Currently UK focused but with extensive experience in the Asia Pacific region in business and project development fields.

David is located in the UK.

Dr Graeme Chown is a Director at PPA Energy and is a power system operations specialist with extensive experience in drafting and preparing grid codes and open access codes. His core skills are in ancillary services, generation unit control, SCADA and real time power control. Graeme worked for 18 years for Eskom, the main power utility in South Africa. He has a PhD in Electrical Engineering and is a member of the South African Institute for Electrical Engineers.

Graham is located in South Africa.

Rebekah Henderson has had a significant amount of experience working in the electricity and telecommunications industries, facilitating industry-led outcomes and providing analytical and administrative services to various industry groups and boards. She has projects and relationship management experience in both the public and private sectors
